

Kentucky Nursery LISTSERV Bulletin

University of Kentucky Nursery Crops Team

End of December 2016

Long Range Outlook Information

Winter is officially here, as far as day length is concerned. The shortest day of the year has come and gone.

Over the next three months, the long range forecasts are calling for above average temperatures for the southern, central and eastern parts of the state (see below), and above average precipitation across the entire commonwealth.

See [UKAg Weather's Long Range Outlooks](#) for a variety of forecasts of temperature and precipitation probabilities.

The University of Kentucky's **Nursery Crop Extension Research Team** is based out of two locations across the bluegrass to better serve our producers.

The **University of Kentucky Research and Education Center (UKREC)** in **Princeton** serves western Kentucky producers while our facilities and personnel on main campus in **Lexington** serve central and eastern Kentucky producers.
